1966 REVEALS THAT THE NEW UNNUMBERED ROAD BETWEEN NVN ROUTE 101 AND LAOS ROUTE 911 IS NOW FULLY CONNECTED BETWEEN THESE TWO ROUTES AND APPEARS TO BE IN LATE STAGES OF CONSTRUCTION WITH LIMITED SERVICEABILITY. VEHICLE TRACKS ARE OBSERVED INTERMITTENTLY ALONG ITS ENTIRE LENGTH, HOWEVER, THERE IS NO EVIDENCE THAT THE ROAD IS CURRENTLY SUPPORTING THROUGH-TRAFFIC. THE ALIGNMENT OF THE PREVIOUSLY UNREPORTED ROAD SEGMENT IS AS FOLLOWS: FROM THE TERMINUS REPORTED IN REF AT 1721N 10612E (UTM XE291188), THE ROAD EXTENDS GENERALLY NNE AND CROSSES THE TOUM PROU (STREAM) AT APPROXIMATELY UTM XE 305206; THEN WNW TO UTM XE287217; AND THEN GENERALLY NNE, JOINING THE PREVIOUS CONSTRUCTION TERMINUS AT 1726N 10613E (UTM XE294294).
